WORK EXPERIENCE

Front-End Development Projects

Self-initiated

- Translated Figma design files into responsive and user-friendly websites using HTML, CSS, and JavaScript.
- Developed and optimized interfaces that improved user experience and site performance.
- Collaborated with peers or mentors to ensure designs met functional and aesthetic requirements.

Projects:

Hubble - Landing Page SaaS (Front-End)

- In essence, the site is a SaaS landing page for a CRM system tailored to ecommerce.
- Understanding customers better through segmentation & personalization.
- Boosting sales and loyalty by making customer relationships easier to manage.

E-Commerce Bike (Front-End)

- It positions the e-bike as a solution for eco-friendly, cost-effective, and modern transportation.
- Clients can instantly see the e-bike's design, features, and purpose without confusion.
- Instead of going to a physical store, all details (specs, images, pricing) are available online.
